

## Homework 2: Circular Sketch Pattern

1. Make a large circle with the ORIGIN as the center.
2. Draw a smaller circle higher up on the y-axis.
3. Draw 2 construction lines of EQUAL length. 1 goes from the center of the large circle to the bottom of the smaller circle. The second line goes from the top of the smaller circle to the top of the large circle. Make sure that the lines are equal.
4. Select the smaller circle and click CIRCULAR SKETCH PATTERN. Make sure the circle revolves around the origin ( $x = 0.0\text{mm}$ ,  $y = 0.0\text{mm}$ ). Change the amount of circles on the pattern to 5.
5. Save sketch as "lastname\_firstname\_hw2"
